

**Open-loop drift addresses all seven constraints with zero contradictions —
predicting two (C1 evolutionary derivation; C5 data-earned held-out test) and explaining five**

C1 Evolutionary why	compat.	compat.	compat.	predicts	explains	predicts
C2 Mortality kinetics	compat.	compat.	compat.	compat.	compat.	explains
C3 Cross-species	compat.	compat.	compat.	predicts	compat.	explains
C4 Hallmark co-occurrence	compat.	compat.	explains	compat.	explains	explains
C5 What works (ITP)	contradicts	contradicts	compat.	compat.	predicts	predicts
C6 Reset/rejuvenation	contradicts	contradicts	predicts	compat.	compat.	explains
C7 Program vs damage	explains	explains	compat.	explains	explains	explains
Σ	Stochastic damage fit -3	Somatic mutation fit -3	Epigenetic noise fit 2	Disposable soma fit 4	Hyper-function fit 4	Open-loop drift (this work) fit 8

predicts (P)
explains (E)
compatible (C)
contradicts (X)
